

p.f.s. folding table

Playfully livening up large rooms.

THE NAME OF P.F.S. FOLDING TABLE SAYS IT ALL: THE „PROGRESSIVE FOLDING SYSTEM“ DOES NOT REQUIRE AN ADDITIONAL STRUT, AND PROVIDES MORE STABILITY AND LEGROOM. THE FOLDING FUNCTION IS EXTREMELY SIMPLE, INTUITIVE AND SAFE. AN INTEGRATED STACKING PROTECTION ENSURES THAT THE TABLE TOP IS NOT DAMAGED DURING STACKING.

p.f.s. folding table

The progressive folding system provides more stability and legroom.

A choice of three frame types is available: Premium-quality, slanted, square tubular steel; minimalist, curved, round tubular steel, and a stylish, sleek T-foot frame.

Lightweight boards are available as an option, making handling considerably easier, especially in event centres. In addition to a weight saving of approximately 45 % compared to conventional chipboards, a lightweight board also scores in terms of environmental friendliness: the corrugated construction made of plant fibre fleece – such as

hemp or flax – not only cuts material consumption by two thirds, but also reduces the use of adhesives by 80 % – for greater material efficiency.

Conclusion

The **p.f.s. folding table** shows its strengths primarily in (large) multi-purpose rooms that undergo a great deal of change. It is therefore ideally suited for the use in congress, seminar or event venues.

Rich in Detail.

Hinges safely.
Easy to manipulate and safe in operation – the hinge mechanism with locking and fold-out protection.

Screens.
Modesty panel for conference use, on the podium or for a presentation – can be removed without tools (optional).

Links quickly.
Lateral or cross linking possible. Linking device from table width 600 mm (optional).

Creates space.
Space-saving and considerate stacking thanks to integrated protection.

Takes it lightly.
Lightweight top option with a sturdy honeycomb core made of natural fibres.

Optional.

Standard model:

Table tops: choice of laminate (MFC), HPL top or HPL light weight top with seamless, moisture resistant laser edge (ABS edge), or compact top. Reinforcement frame made of galvanized steel for table length 1400 mm and longer, with white eco top from table length 1200 mm.

Frame: choice of four-leg base either made of rectangular profile 50/20 mm or steel tube Ø 35 mm or T-leg base made of steel tube Ø 35 mm, black adjustable plastic glides, integrated stacking protection. Powder-coated metal surfaces. Folding mechanism made of die-cast aluminium, powder-coated analogous to the frame, fold-out protection. With frame in chrome: black powder-coated folding fittings.

Modesty panel height 350 mm (optional): perforated sheet steel, detachable without tools. Tables with mounted modesty panel cannot be folded or stacked.

Linking device (optional from table width 600 mm): steel and plastic. Lateral or cross linking possible.

Important note: we recommend the use of linking devices for table configurations, otherwise the table tops may not be level if the floor is uneven.
