yuno

Stacks without folding.

yuno impresses with minimalist elegance combined with an innovative design concept: it adopts all the positive features of a folding table whilst avoiding its weaknesses. *yuno* stacks easily and compactly without the need to fold the frame, meaning a significant time saving when setting up and dismantling tables, as well as space-saving storage.

To make it even easier to handle the tables, small castors are integrated into the glides. Thus, the tables do not have to be carried around. Instead, if lifted slightly on one side, they can be rolled from the transport trolleys to exactly where they are needed. In combination with the customised stacking trolley, this feature means *yuno* can be transported and stacked by just one person.

***yuno*. The smart alternative to the folding table.**

In large, multifunctional rooms and halls highly efficient handling of tables and chairs is especially important. The *yuno* stacking table was devised for exactly these kinds of spaces. The design of the table facilitates compact stacking – with no need to fold the frame. *yuno* thus pioneers an entirely new generation of stacking tables. Moreover, *yuno*'s high quality, aesthetically appealing design makes it an attractive choice for areas such as seminar rooms and creative spaces.

What is particularly practical when setting up tables for banquets or in rows is that, unlike traditional folding tables, *yuno* can be linked lengthways without additional linking elements thanks to its special interconnecting frame. This longitudinal alignment can be achieved in two ways: if the table legs are positioned side by side, the table tops join seamlessly. On the other hand, if the table legs are linked, so that together they form one leg, a space is created.

Rectangular table

Table height

Alignment of tables

Stackability:

Up to max. 10 tables on the floor and on the transport trolleys.

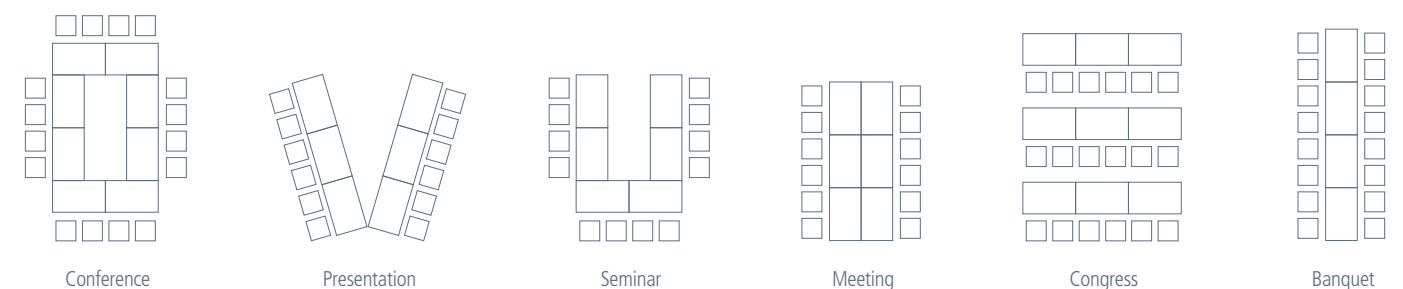

Stacking on the floor

Transport platform 6395

Stacking trolley 6398-000 (example with table length 1600)

Dimensions in mm

Standard model:

Table tops:

Choice of decorative laminate (MFC), laminate panel HPL or HPL light-weight top with seamless, moisture-resistant laser edge (ABS edge), or compact top.

Frame:

Legs and cross beam tubular steel. Joints and table top support die-cast aluminium. On powder-coated frames, surface finish of cross beam and table top support matches the legs. With chrome legs, cross beam and table top support powder-coated in black. Plastic glides with castors, black. Cross-section: leg 50/20 mm, cross beam 30/15 mm. Metal surfaces powder-coated.

Alignment of tables:

The tables can be aligned lengthways without additional elements by interconnection of the frames.

Linking device (optional):

Steel and plastic, for table width 600 mm plastic. Lateral or cross linking possible.

Modesty panel height 280 mm (optional):

Textile covering, black. No tools required for mounting.

Important note:

We recommend the use of linking devices for table configurations, otherwise the table tops may not be level if the floor is uneven.

Perfect Partners.
